

PROFILE

Backend and platform engineer who shipped 40+ production services across healthcare, real estate, telecom, fintech, government, and enterprise systems. Polyglot backend in Go, Node.js/TypeScript, and .NET; GCP-primary platform work with Kubernetes, event-driven systems, and production observability.

CORE SKILLS

Languages	Go, Node.js/TypeScript, C# (.NET), PHP	Platform	Kubernetes, Docker, Helm, GCP, AWS, Azure
Systems	Kafka, GCP Pub/Sub, Redis, gRPC, GraphQL, REST	Data	PostgreSQL, MySQL, SQL Server, MongoDB, Elasticsearch, ClickHouse
Operations	OpenTelemetry, Datadog, Sentry, LaunchDarkly		

EXPERIENCE

Refactory	2017—Present
Senior Software Engineer	
- Shipped 40+ production services across 7+ client domains: real estate, healthcare, government, telecom, fintech, LMS, and platform. - Standardized Datadog, Sentry, OpenTelemetry, and GCP Pub/Sub patterns across engagements, cutting new-project onboarding from weeks to days. - Introduced AI-assisted development practices agency-wide, cutting boilerplate time by approximately 25%.	
Keller Williams / KWRI · Backend Engineer	2020—2024
- Shipped 20+ Go, NestJS, Apollo GraphQL, and Lumen microservices on GCP Pub/Sub powering KW Connect and Command. - Migrated a 10+ service legacy platform from AWS to GCP/GKE and standardized Kubernetes, auth, and observability patterns.	
RSUD Regional Hospital · Platform Engineer	2026
- Moved database access to PgBouncer with read/write replicas, cutting application CPU and load from 100% to 30%. - Migrated deployment to k3s, eliminating release downtime and enabling horizontal scaling.	
Cellcast · Backend Engineer	2024—2026
Built Go and Node.js backends, AWS Lambdas, and an SMPP proxy handling 1 million SMS sends per hour.	
Bio Farma · Backend Engineer	2024—2025
Architected a six-service healthcare ecosystem using NestJS, MongoDB, GCP Pub/Sub, and OpenTelemetry.	
SEV-2 Hosted Services · Platform Engineer	2024—Present
Built and operated a multi-tenant platform with shared auth, observability, and deployment patterns.	
Komatsu LMS · Fullstack Engineer	2025—2026
Delivered an enterprise LMS across backend, frontend, and mobile using Supabase and Kubernetes/Helm; integrated HRIS authentication and an AI-assisted learning module.	

Software Engineer

- Delivered timesheet, supplier portal, and canteen systems on .NET 7, Clean Architecture, EF Core, and SQL Server.
- Shipped REST APIs with health checks and Quartz scheduling, automating previously manual batch workflows.
